

Ayman Salama Helbawy

Junior .NET Backend Developer | ASP.NET Core | Web APIs | EF Core | SQL Server

Cairo, Egypt | +20 150 143 5003 | Ayman.Backend@Gmail.com | [linkedin.com/in/aymansalama48](https://www.linkedin.com/in/aymansalama48) | github.com/aymansalama48

PROFESSIONAL SUMMARY

Junior .NET Backend Developer with hands-on experience building RESTful APIs and multi-tenant systems using ASP.NET Core, Clean Architecture, CQRS, EF Core, and SQL Server. Strong problem solver focused on secure backend design and clean, maintainable code.

PROJECTS

CodePilot — Multi-Tenant Project Management API (github.com/aymansalama48/CodePilot) Jun 2026 - Present | Cairo, Egypt

- Tech Stack: ASP.NET Core, Clean Architecture, CQRS, MediatR, EF Core, SQL Server, JWT Authentication, RBAC
- Designed feature modules using Vertical Slice Architecture with independent Commands, Queries, and Handlers
- Enforced multi-tenant isolation, permission-based authorization, and consistent API error handling through custom pipeline behaviors, JWT authentication, OAuth integration, and a Result/Error pattern
- Automated audit trails, soft deletes, and a 9-template transactional email system via EF Core interceptors

CommerceOs — Multi-Tenant E-Commerce Platform (github.com/aymansalama48/CommerceOs) Jan 2026 - May 2026 | Cairo, Egypt

- Tech Stack: ASP.NET Core, EF Core, SQL Server, ASP.NET Core Identity, JWT, React 19, TypeScript, Serilog
- Eliminated cross-tenant data leaks across 35+ tables using EF Core Global Query Filters
- Engineered a 10-state order lifecycle with RBAC-gated transitions, supported by dual JWT sessions across 7 roles and silent token refresh
- Delivered a React storefront with dynamic pricing, coupon logic, and real-time shipping calculation

WORK EXPERIENCE

Backend Development Intern — CodePlus Aug 2026 - Present | Cairo, Egypt

- Tech Stack: ASP.NET Core, CQRS, MediatR, Repository & Unit of Work, Hangfire, Docker
- Applying advanced architecture and design patterns (CQRS/MediatR, Repository & Unit of Work) in ASP.NET Core Web API sessions
- Working with background jobs, caching & resilience, observability, system design, Docker, and CI/CD for production-grade backend systems

TECHNICAL SKILLS

Backend: C#, ASP.NET Core Web API, RESTful APIs, ASP.NET Core Identity, JWT Authentication, RBAC, Dependency Injection, Background Jobs (Hangfire), Caching & Resilience

Architecture & Patterns: Clean Architecture, CQRS, MediatR, Vertical Slice Architecture, Multi-Tenant Architecture, System Design, Repository & Unit of Work, Result Pattern, FluentValidation

Database: SQL Server, Entity Framework Core, LINQ, Global Query Filters, SaveChanges Interceptors

Testing & Quality Assurance: Unit Testing, xUnit

DevOps & Tools: Docker, CI/CD, Git, GitHub, Postman, Swagger/OpenAPI, Scalar, Serilog, Observability

Frontend: React, TypeScript, JavaScript

EDUCATION

.NET Web Development Diploma — IT Legend Aug 2024 - Dec 2025 | Cairo, Egypt
Coursework: OOP, Advanced C#, Data Structures & Algorithms, SQL Server, ASP.NET Core

Bachelor's Degree in Management Sciences Oct 2020 - May 2024 | Cairo, Egypt
Higher Institute for Computer and Administrative Information Systems
Grade: Very Good

LANGUAGES

Arabic: Native | **English:** Working Proficiency
